

The Four Hearts Foundation

Holiday Letter

2019

The years change, but the need stays the same. On this final month of 2019, let us reflect on just a few of the many situations that The Four Hearts Foundation has provided assistance for:

Vaccinations and boosters - \$150

Medication for ear infection and inflammation - \$50

Blood testing/medication/follow up - \$320

Tumor removal - \$800

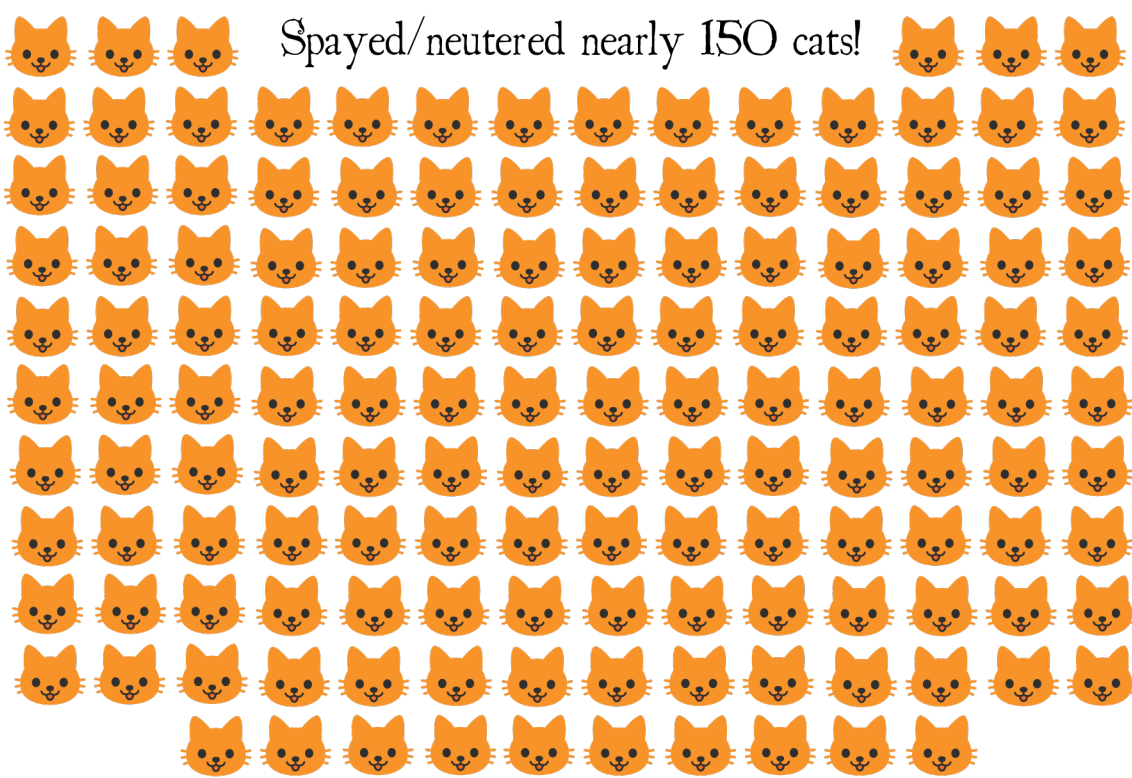

UTI treatment and office visit - \$50

Torn ACL surgery - \$400

Added rabies vaccinations to our spay/neuter clinic services!

Spayed/neutered nearly 150 cats!

But we would not have been able to provide these needed services without donors! 100% of our contributions to the community come from your donations.

We helped with quite a few heavy hitting medical bills this year, but in order to continue and not turn people away, we absolutely must have donations. No amount is too small.

\$5 Will help a cat get their rabies vaccination for the year.

Will help cover the cost of a cat spay or neuter. **\$20**

\$50 Will help cover most vet office fees.

Too many of us are aware of how quickly the bills can pile on. When something minor turns into a series of office visits, medications, x-rays, and overnight stays. Was someone there for you when you needed it? Who will you be there for? If you are in a position to help, no matter the amount, please contribute to our cause. Many families and their companion animals will be forever grateful.
